# ABOUT PRISMA

PRISMA is a dynamic research firm of Rwandan law, created in 2007. It is a sole proprietorship belonging to Engineer Msc RUHANGA William BINEGO, holds a degree in Civil Engineering and a Master's degree in infrastructure of transport of the National School of Bridges and Roads and University Paris 12 (Joint Diploma). Its headquarters are in Kigali, while its work extends throughout the country and in the sub-region.

Our society was born in a context of full expansion of Rwanda's economy, which has led to an unprecedented development in the building and public infrastructure sector.

Our goal is to help solve the project management problems observed in several projects in the field of construction, civil engineering and infrastructure.

# WHAT WE DO

## In the building sector

We carry out architectural and technical studies and supervision of construction projects, including:

- Definition of architectural programs
- Development of detailed construction plans
- Dimensioning of the supporting structures
- Determination of construction costs
- Preparation of bidding documents
- Financial evaluation of projects
- Supervision and control of construction work
- Management of construction projects

## In the roads sector

- Origin destination survey;
- Traffic study and counting campaign;
- Topographic study and determination of the state of the premises
- Geotechnical study and research of quarries of borrowing materials
- Design of the roadway, shoulders and structures
- Design of earth pavements, stone pavers and bitumen
- Preparation of bidding documents
- Supervision and control of construction work.

# WHAT WE DO

## In the field of hydraulics

We carry out technical studies and supervision of the works of water supply projects, including:

- Technical design of systems;
- The establishment of management structures
- Environmental and social impact studies of AEP projects
- The preparation of bidding documents;
- Updating / storing existing systems;
- The rehabilitation of systems; supervision of works;
- The receptions of the works.

## In the field of electricity

- Identification of energy needs
- Determination of the available amount of energy
- Update / stand of the existing network
- Dimensioning of cables and structures
- Network Design
- Elaboration of bidding documents
- Mission of supervision and control of works.

# WHAT WE DO

In the field of  
town planning  
and spatial  
planning

- Environmental and social impact studies of development projects
- Topographic studies of the sites
- Development of site subdivision plans
- The development of the cadastral plans of the subdivisions
- Development of the cadastral files on Arcview and ArcGIS
- Parcel boundaries of subdivisions
- Hydrological study of the sites
- Dimensioning of hydraulic structures
- Preparation of management plans and drainage of marshes

To satisfy the requirements of the good execution of the works in these various orientations, the PRISMA design office counts on a highly qualified and experienced staff.
